

## DH-100A Stand Pouch Pellet Filling Packaging Machine

This series auger filling machine is designed mainly for fine powder which easily to spout dust & high-accuracy packing requirement. Based on the feedback given by below weight sensor, then machine complete double speed filling, measuring, up-down work etc, it is suitable for additive, carbon powder, fire extinguisher powder, other fine powder which needs high packing accuracy.

### Usage & Main Advantages:

Rotary packing machine is developed for daypack, premade bag, stand-up bag with or without zipper.

It is suitable for packing product of powder, granule, irregular shape, such as gourmet powder, chicken powder, seasoning powder, candy, fruits, nut, pet food, roasted seeds, puffed food, frozen food, small hardware.

### Main Technical Data:

Model	DH-100A
Average speed	20-50 bags/min
Bag size	L≤350mm W80-210mm
Packing type	Bags(flat bags, doypack ,zippered bags, M bags etc irregular bags)
Compressed air quantity	6kg/cm <sup>2</sup> , 0.4m <sup>3</sup> /min
Packing material	Single layer PE film, PE complex film etc
Machine gross	700kg
Power supply	AC208-415V, 50/60HZ
