YX-BS High Speed Bottles Labeling Machine

YX-BS High Speed Bottles Labeling Machine characteristics:

- The PLC control combined with touch screen providing user friendly operation and high precision.
- The memory of 60 groups of labeling specifications can exchange the production line quickly.
- The equipment is up to the mustard of GMP requirements and made of SS304 which is treated by anodic of high-class aluminum alloy.
- The machine has many functions such as count, attach label and so on.
- The labeling position of height and angle can be adjusted.
- The modular-design makes this machine suitable for operation together with other machines or in a production line.
- The machine can be used to label the body and bottleneck at the same time with some changes.
- The hot printer and transparent label sensor are optional.

YX-BS	
Speed (pcs/min)	60-260
Driving Mode	Servo control system
The size of bottle	Out diameter 12-24mm,
Height	25-95mm
The size of label	Height 20-70mm Length 25-80mm
The inner diameter of label volume	76mm
The outer diameter of label volume	350mm (max)
Power of motor	300W
Power supply	AC220V 50/60HZ single phase
Dimension (mm)	1800 (L) * 700 (W) * 1270 (H)
