

## Automatic Bottled Drink Shrink Wrapping Packing Machine TT-FQL450/550/650

Automatic L-Bar Sealer is an entry-level automatic sealer which provides an economical, durable and easy-operated solution for packaging. It is also widely applicable to various industries such as toys, cosmetics, tools foods, stationeries, daily commodities, electric appliances, etc. With the uniqueness of the perforation system, it has been successfully granted us a leading position in the industry.

### Features

1. Automatic feeding or manual feeding can be choose.
2. Machine adopts high quality steel to ensure the long service life.
3. Temperature control using high-precision intelligent temperature controller system.
4. Speed adjustable front-end feeding system and the back-end storage work platform make the whole machine truly achieve high speed and unmanned automatic operation.

### Specification

| Machine Model                      | TT-FQL450  | TT-FQL550 | TT-FQL650 |
|------------------------------------|--|-----------|-----------|
| Maximum package size L+H (H<150mm) | < 500mm  | < 600mm   | < 700mm   |
| Maximum package size W+H (H<150mm) | < 400mm  | < 500mm   | < 600mm   |
| Sealing knife size L*W(mm)         | 550×450  | 650×550   | 750*650mm |
| Use air source                     | 5-7kpa   |           |           |
| Packing speed                      | 10-30 bag/min According to the product character |           |           |
| Power                              | 1.5-4.5KW AC220V/380V±10% 3-PHASE 50HZ/60HZ      |           |           |
