

## *KENO-F109 Semi-Automatic Double Head Liquid Filling Machinery*

The Model KENO-F109 is a product innovated and upgraded on the basis of this company's series products and introduced foreign advanced filling machine technology. The product is simple and reasonable in design, high in accuracy and easy in operation. Suitable for filling liquid in the industries of pharmaceuticals, daily chemicals, foodstuffs, cosmetics, pesticide and special trades. With no need for power supply, the machine is safe and with the personalized design, can meet the modern enterprises' requirements. This machine is the semi-automatic double piston liquid filling machine, working under the state without electricity, and it is safer to operate. This machine has two filling heads in-phase, improving the work efficiency. This machine reasonable in design, smart in model, easy to operate, the pneumatic part adopts the pneumatic components of Germany FESTO and Taiwan's AIRTAC. The part contacting materials is made of 316L stainless steel. With adjustment handle of filling volume, the filling speed can be adjusted at will, with high filling accuracy. Filling head adopts anti-leakage, anti-pull and with diving filling device.

### **Parameter**

- Air pressure: 0.4-0.6MPa
- Filling speed: 10-40 Bottle/min.
- Filling accuracy: 0.01
- Filling volumes range: 25-60ml, 50-125ml, 100-250ml, 200-500ml, 400-1000ml, 900-2500ml, 2200-5000ml
