

LTB-A Labeling Machine

LTB-A labeling machine is applicable to label round bottles and round objects in various industries. It's controlled by stepping motor. With the imported touch screen, it features accurate labeling, small errors and high efficiency.

Features:

- PLC Control System which is easy to control
- Simple Straight Forward Operator Controls
- Stainless and open Frame design, easy to adjust and change the label
- Stamping Coding Device attached
- Rolling wheels press bottles and make the labels more firmly.
- After labeling, finished products are easy to collect

Technical Parameters:

Model	LTB-A
Suitable bottle diameter	Φ20-Φ100mm
Suitable label range	Height: 20-90mm, Length: 20-270mm
Capacity	30-80 bottles/min (depending on the bottle size and label size)
Labeling tolerance	±1mm (not consider the tolerance of the bottle and label)
Power supply	220V; 50Hz
Power	500W
Dimensions	2000x1100x1500mm
