

ZKBZ005 Fully automatic vacuum skin packaging machine

Product Introduction:

1. This vacuum packaging machine adopts advanced skin packaging technology, which can effectively isolate the outside air, ensure the freshness of food, and avoid odor pollution.
2. The operation experience is convenient and the simplified operation interface makes it easy for novices to get started.
3. The overall configuration is a fully enclosed chassis, which is safe and reliable, providing a stable environment for packaging operations.

Product details:

1. Fresh-keeping function: The body film fits the product shape tightly, completely isolates the air and external bacteria, greatly inhibits the product's own decay process, and ensures the freshness of the product while avoiding the cross-flavoring of different ingredients, so that each ingredient can be kept fresh for a long time. Whether it is fresh meat, fruits and vegetables, or dry goods, they can maintain the best quality.
2. Convenient operation: Simplify the operation interface and remove complicated operation steps. Users only need to operate simply to easily complete the vacuum packaging process. No complicated training is required to get started, which improves work efficiency.
3. Safety and stability: The closed chassis design can prevent external impurities from entering the packaging area and ensure a clean packaging environment. On the other hand, it can effectively avoid accidents and ensure the safety of operators.

Product Parameters

(v/Hz)voltage	AC 380/50
(W)Motor Power	3000
(W)SealingPower	1400*2
(Kpa)Ultimate Vacuum Pressure	1
(pcs)No.of Sealing Bars forEach Chamber	2
(LxWxH)(mm)Chamber Dimension	1300*870*180
(mm)Sealing Length	1200
(mm)Sealing Width	8
(m' /h)Vacuum Pump Rate	100
Material for Vacuum Chamber	Stainless steel 304
(LxWxH)(mm)Dimension	1310*900*1040
(kg)Net Weight	500
(mm)The center distance between two sealing bars	650
