

BCK-240 / BCK-300 Mini-size Filling and Packaging Machine

The mini-size filling and packaging machine is a compact packaging machinery used to fill and package small quantities of products into bags, sachets, or containers. This type of machine is ideal for small to medium-sized businesses that need to package products in small quantities or for businesses that have limited space for packaging machinery.

Feature

- Stainless steel structure.
- Bag-making, measuring, filling, sealing, cutting and counting are all finished automatically.
- Either under set length control or photoelectric color tracking, bag length is set and cut in one step, time and film saving.
- The driving system is simple and resalable, maintenance is easy.
