

Dropper Bottle Filling Machine with Dust Cover

It can be used to fill various round bottles, such as E-liquid, essential oil, VG PG seed oil, etc. it can fill 5-50ml. High precision cam provides a regular plate for positioning, cork and bottle cap; Accelerate the cam, and the cover head will move up and down; Continuously rotate the screw cap of the arm; Peristaltic pump to measure the filling volume; All actions can be controlled by touch screen.

Six Competitive Edges of Our Dropper Bottle Filling Machine With Dust Cover:

1. This machine has a high position, no bottles, no filling, no capping.
2. It can carry out man-machine dialogue, simple operation, easy to use, and has accurate filling liquid level.
3. The host adopts step frequency conversion.
4. The number of products can be controlled.
5. When the machine breaks down, it will be prompted, such as pressing down, no refueling, no plug, etc.
6. If there is no filling, or if there is no lid, it will stop.

Technical Parameters

Filling volume	5-50ml
Loading error	≤ ±1%
Rotation (rolling) Cover pass rate	≥99%
Production capacity	30-50BPM
	60-90BPM
Power supply	380V/50Hz
Power	2.0 kw
Weight	600 kg
Dimension	2000*1000*1500mm
