

## ***BSE5040A Jet PE Film Shrink Packaging Machine***

BSE-A series Jet PE film shrink packaging machine is designed especially for PE shrink film. However it is suitable for other types shrink films.

The heat produced by heating pipes flows fast inside of shrink tunnel by two large-power AC fans; Under the help of isolation board with many holes, air that comes out from holes on isolation board produces strong circulating hot airflow inside of shrink tunnel and makes tunnel in very even and stable temperature. Furthermore, isolation board prevent packing goods from burning by heating pipes. Hence it reaches perfect shrink effect. This machine is the best to pack products in uneven surface. Super cooling system outside cools down the shrunk film and makes the figuration perfectly.

### **Specification:**

<b>Model</b>	<b>BSE5040A</b>
Power supply	3phase 220V/380V 50-60HZ
Heater power	20KW Adjuster
Conveyer speed	0-10m/minute
Tunnel size(L*W*H)	1500*600*460mm
Conveyer loading	30KGS MAX.
Machine size	2500*920*1680mm
Machine weight	470KG
Shrink film	PE,PVC,POF,PP
