

DQL6560PEG Automatic PE film L-Type Sealing Machine

The automatic DQL6560PEG L type sealer is an integrated automatic production line. Products are fed by conveyor into the plastic sheeting and cut automatically. It has a PLC program control as well as a specially designed protector on the cutting head. Center fold POF/PVC film is used to automatically dispense, wrap, and seal over your disired product. Once the product is sealed it then automatically runs through the thermal shrink tunnel where the shrink film is heat shrunk tightly around product. It can cut PE film.

Specification:

Model	DQL6560PEG
Voltage	220V 50HZ/60HZ
Power	3.2KW
Working table height	810mm
Conveyor loading	30kg
Air pressure(Kg/cm2))	5
Capacity	0-30pcs
Packing Material	PE(0.03-0.06mm) POF(0.012-0.038mm)
Max packing size(mm)	W+2H≤700mm,H≤230mm
Min packing size (mm)	L>=120mm
Max Sealing size	L550*W500*H220mm
Max packing size	L100*W60*H5mm
Machine size	L2064*W1650*H133
