

## *HL TE High-speed Labeling Machine of Cartons*

HL TE is a high-speed labeler designed to seal both corners of cartons. Equipped with an HERMA 500 label head and servo driven's transport system ensures that containers are labeled precisely with high performance. A combination of a guide and a sponge roller ensures clean adhesion without any wrinkles or bubbles in high speed.

### **Features**

- Herma 500 label header & Servo driven system
- Guide and Sponge roller system for label adhesive
- Servo driven up/down gripper conveyor
- Individual rejection system
- Available for label printing and camera systems ( option )
- Applicable for alternate / even carton with horizontal labeler head
- Available for 21 CFR Part 11

### **Specification**

Model	HL TE
Output	350 products /min
Format range	A/30 - 100 x B /15-90 x C/ 80 – 150 mm
Label size	W/12 – 100 x H/12 - 76 mm
