

JMJ-5 Uphill Medicine Polisher Deduster

Uphill Medicine Polisher deducted also employed many new designs, to allow and to ensure a better and safer production. This machine is able to act ad both elevatong and deducting machine, which made it a usual combination with other tablet-compressing machine and metal detection machine, and also made it extremely applicable in the field of pharmacy, chemical engineering, electronics and food.

Feature

1. Automatic feeding, reduce manual operation, improve efficiency.
2. The dust removal path is long, automatic surface polishing, deburring, static electricity, no damage to the tablet, good effect.
3. Suitable for different types of tablets, no need to replace parts

Technical specification

Model	JMJ-5
Production capacity(pcs/h)	1,000,000 (Φ6mm)
Removal distance(m)	6.2
Applicable	Φ3-Φ25
Compressed Air	0.1M3/Min 0.05Mpa
Vacuum	2.7M3/Min 0.1Mpa
Power supply	220V, 50HZ,1 phase 0.15kw
Dimensions(mm)	500*550*1400
Weight(kg)	80KG
