

HC-50 Automatic Vial Bottle Capping Machine

This machine is an economical and practical small particles of powder and automatic filling machines, automatic positioning can finish the bottle, filling and metering, etc., by filling his head, a conveyor belt and chain plate composed of a positioning device, the use of servo motors, PLC and touch screen control, easy operation, high stability. With Unscrambler, capping machine, labeling machine set of filling lines and other components. Used for packing powder and small particles of materials such as powder, small granules of drugs, veterinary drugs, glucose, spices, solid drink, toner, powder, pesticides and so on.

Technical Parameters

Power supply:	220V 50HZ 110V 60HZ
Power:	1500W
Capping speed:	10-30 bottle/min
Cap diameter:	20-50 mm
Bottle diameter:	20-120 mm
Machine size:	2000*900*1600 mm
Machine weight:	300Kg
