

## *HL-L460K Vertical Granular Packing Machine*

### **Product introduction:**

- Imported PLC full computer control system, man-machine interface, super large display touch screen, easy to operate, intuitive.
- Servo film conveying system, pneumatic control system, accurate positioning, excellent performance of the whole machine.
- Intelligent temperature controller is used to control temperature accurately and ensure the sealing is beautiful and smooth.
- Perfect automatic alarm protection function to minimize the loss.
- The machine can automatically complete the whole packaging process of metering, feeding, filling, bagging, date printing, inflating (exhausting), and finished product output, and complete automatic counting.
- Bag Making Form: This machine can make pillow-shaped bags, vertical corner folding bags and hanging hole bags according to customers 'needs.

### **Technical parameters:**

| Model              | HL-L460K       |
|--------------------|----------------|
| Bag Length         | 80-300mm       |
| Bag Width          | 80-220mm       |
| Packing Film Width | 180-460mm      |
| Packaging Capacity | 50-2000ml      |
| Packaging Speed    | 10-75 bags/min |
| Power              | 2.5Kw          |
| Gas Source         | 0.65Mpa        |
| Air Consumption    | 150L/min       |
| Weight             | 600Kg          |
