RJWJ-115/200C/300C Soft Gel Capsule Making Machine

The Soft Gel Capsule Producing Machine precisely injects oils, suspensions, and pasty materials into capsules, forming softgel capsules in various sizes, shapes, and colors.

Features

Rapid Disintegration: Softgel capsules disintegrate quickly, making them easy to swallow and resistant to oxidation.

Convenient Storage and Use: These capsules are easy to store and handle, contributing to their growing popularity.

High Productivity: Softgel encapsulation is favored by manufacturers across various industries, including pharmaceuticals, health products, cosmetics, and paintball, due to its high productivity.

Precision and Quality: The machine ensures precise filling, consistent quality, and a high finished product rate, making it a reliable choice for large-scale production.

Specification

Weight(kg):	960
Filling Accuracy:	1 (%)
Power:	6Kw
Packing Volume:	5 (L)
Subpackaging Capacity:	1 (ml)
Applicable Industries:	Daily chemicals, medicine
Filling Speed:	10000 to 150000
Packing Type:	Capsules
