

VCX-8 Automatic Capping Machine

VCX-8 Automatic Capping Machine is used in various configurations containers, irregular containers. It can be divided into scrape capping and grasp capping according to different caps. The max capping speed can reach 80 bottles/min of 6 heads or 100 bottles/min of 8 heads.

Features:

1. This machine has eight mechanical hands, dispatches caps in high speed with no inverse cap
2. Supply cap machine and mechanical hands working with synch.
3. When cap tighten finished, bottle and cap relatively stop.
4. Clutch separate, bottles and cap are not injured.

Technique Parameter:

Power supply	AC 220V 50Hz
Power	1.5KW
Weight	680Kg
Suitable container	height: 80mm-280mm diameter: Φ 30mm- Φ 100mm
Production Capacity	6 heads-4800 bottles/hour 8 heads-6000 bottles/hour
Suitable cap	$\Phi \times H$ Φ 12mm— Φ 50mm \times 15mm—50mm
External dimension (L \times W \times H)	2000mm \times 1200mm \times 2300mm
