

Powder Packaging Machine AP- 1200P

This Model AP-1200P can attain the maximum speed up to 60 SPM that helps to do speedily packaging of powder and granules. This model with its electronic web edge controlled mechanism is perfect for packing and sealing approx. 300 grams of product. Its 4 side sealing offers absolute safety and helps to efficiently seal free flow powder & granules products.

Salient Features:

- Web controlling is done through electronic web edge control
- Servo driven film draw mechanism
- Stainless steel structure
- Can pack and seal the powder and granules in the pouch having maximum length up to 220mm
- Fast changeovers
- Maximum roll width of 1200mm
- Uses optimum electrical power up to 12KW
- Operating panels easy to use

Technical Specifications:

Machine speed	Up to 60 SPM depending on the product & sachet/pouch dimension.
Packing range	Suitable to pack up to 300 gram and depending upon product to be packed
No. of tracks	Up to 10 tracks depending on sachet/pouch width
Max. roll width	1200 mm
Max. roll dia	500 mm
Max length of pouch	Up to 220mm
Film draw mechanism	Servo based.
Web controller	Electronic web edge control
Compressed air	4 CFM @ 6 kg/cm sq
Electrical power required	Up to 12 KW
Main Body Frame	Option:-
	- MS with Powder coating.
	- MS with SS cladding
Type of Sealing	4 Side Sealing
Machine dimension	2530 mm X 3375 mm X 2300
	(Height mm X Width mm X Length mm)
Net weight	3500 kg
