

Commercial 3D Bopp Cello Wrapping Machine For Soap CKB-300A

This cello wrapping machine is a new kind of multi-purpose packaging equipment, which can be used in many industries, such as food, cosmetics, daily necessities, etc. We are the soap wrapping machine supplier with our own factory, which can ensure the high quality and low cost of the machine

medicine

cosmetic

food

stationery

chewing gum

playing cards

cigarette box

mosquito coil box

Soap Wrapping Machine Features:

- Stable system is adopted to make the machine more smooth in operation. High quality parts from China are used in the bopp cellophane wrapping machine, which helps to reduce machine wear and ensure better service life of the machine.
- The machine adopts compact structure design, with high-quality parts, so that the performance of the machine is stable, operation and maintenance is more convenient.

- The multi-function digital frequency conversion system is used in the soap wrapping machine, which can change the speed and make the packing speed meet the customer's requirements.
- The transmission part of the machine is equipped with protective devices to make the machine and operators safer.
- The cello wrapping machine can adapt to a variety of different specifications of packaging, mold easy to replace, a wide range of applications.

BOPP Cellophane Wrapping Machine Performance and Structural Characteristics:

- * Adjustable packaging speed: Using frequency conversion adjustment device, it can change the packaging speed according to different work requirements.
- * Adjustable package size range: When the dimensional specifications of the package change, only replace the mold and make appropriate adjustments.
- * Heat sealing temperature adjustable: The heating temperature can be set by itself depending on the external climate, and can be maintained within the set temperature range.
- * Feeding device: It consists of a combination of a tray and a hopper, and the feeding is continuously performed in a stack.

Model	CKB-300A
Wrapping material	BOPP heat sealing film
Packing speed	30~50 bags/min
Packing size	L(50-220mm)*W(20-130mm)*H(10-70mm) mm
Power	220V50HZ
Total Power	4.5KW
Weight	750Kg
Dimension	2100*750*1550MM
