

Advantage Machinery provides all types of accessories for the shrink packaging industry, such as automatic feeders and delivery table. The automatic feeders come standard as a plug and produce system, where they are 100% compatible and in sync with any of our automatic sealers. The feeder and the sealer work synchronized to ensure the highest possible productivity. We can also provide automatic feeders to adapt to your existing systems. Please tell us what your production needs are and we can custom design a machinery line for you.

Side Feeder

Automatic Magazine and Brochure Hopper

180 Degree Turn Around Conveyor

The Advantage Machine 180 Degree Turning Conveyor is an easy to set up accessories that goes perfect with our T-101, T-201 or T-301. The conveyor transports the product out of the heat tunnel to the front of the machine in order for the same machine operator to have access to the final package. The Conveyor can also be used with other brand tunnels or systems.

Inches:

Model	180C
Conveyor Depth (in)	45
