

Granulator FZ-150

This machine is used mainly in such trades as pharmacy, chemical industry, food, pottery, and plastics extensively, making moist powder material particle. Make cylinder swing reciprocally, extruding material from screen mesh for granulation. It also can be used for crushing the agglomerate materials into small granules directly.

It is very suitable for the material of high viscosity.

Application:

Grinding raw materials, granulating wet and dry materials, unqualified tablets to be recycled can be granulated according to the requirement of granularity.

Foodstuff: Grinding of biscuit for recycling.

Others: Grinding and granulating of rough raw material and lump material

Specifications:

Model	FZ-150
Capacity (kg/h)	150
Screen (mesh)	6-80
Speed (rpm)	3000-3600
Power (W)	1500
Measure (mm)	900x500x1450
Weight (kg)	220
