

Four Sides Horizontal Form Fill Seal Machine HH-250A

HH-250A horizontal four sides sealing automatic wipes packaging machine is my company newly developed paper and non-woven wipes packaging equipment, the whole machine adopts imported electric appliances, integrated design has a high reputation in domestic market.

Characteristics:

- PLC automatic control system, electrical components adopt international brand
- Single package, double package design freedom
- Photoelectrical tracking, more accurate in the position sealing and cutting
- Adopt imported metering pump, control precision, a variety of liquid can subcontract and wet package
- All control by the software implementation, convenient function and technology upgrade

Technical Parameter:

model	HH-250A
single bag size	Length:40-125mm width:40-110mm
wet tissue unfolded size	L:40-280MM W:20-280MM
wet tissue folded size	according to the packaging size
film width	80-250mm
packaging speed	60-160bags/min
power supply	380V 50HZ 6KWS
folded type	horizontal :10folded Vertical :4folded
insude film roller and tissue roller diameter	700-750mm
