

DXDK-series Sachet Packing Machine

This machine is for granule, sugar, milk powder, honey, and syrup filling and sealing. Joysun packaging machine manufacturer providing vertical form fill seal machine to make bags with three-sides, four-sides, and back-side sealing. Our machine can be used in pharmaceutical industries. Conform to GMP and FDA regulations. Our bag filling machine can be used in the food and pharmaceutical industries.

Functions and Application:

This machine has a series of automatic functions such as automatic feeding, measuring, bag forming, filling, sealing, coding and finished product discharging; it can also realize the function of automatically aligning the color code recognition according to the user's requirements. The loading part of the machine adopts many different ways.

This Packing Machine is widely used in the automatic packaging of non-tacky granule materials in food, pharmaceutical, and chemical products. Products such as (medicine) granules, grain, instant coffee, MSG, sugar, desiccant, etc. It can also be used for the packaging of powders, liquid, and viscous liquid like honey, syrup.

Parameter:

Max. Packing width (mm)	≤450mm
One-time line-bag no.	2 – 6 lanes upon bag size and material
Packing material	Max. film width: 450mm ; Max film roller: φ280mm ; Roller core:φ75mm ; film thickness:0.05 – 0.1mm
Passing rate (%)	99%
Power	380V/50Hz/3phase; 460V/50Hz/3phase; 220V/60Hz/3phase;
Total power	6kw
Compressed air (mpa)	0.6 Mpa
Air consumption (m ³ /h)	2.5 m ³ /h
Noise (dba)	78dB(A)
Dimension (l*w*h)	1200*1500*2600mm
Cutting frequency	20-40times/min, can be adjusted;
Weight (kg)	1900kg
Working process auto-control	Material filling, packaging material tension, sealing temperature, cutting speed, tangent control, stepless speed regulation
Bag size	width 16.5mm≤W≤70mm length 50 mm≤L≤190mm
Coding	Hot coding system
Cutting way	Flat cut, tooth cut, round cut
