

Capsule Filling Machine DTJ-V

This machine is used for filling the powder or pellet into the capsule. Semi-automatic Capsule Filling Machine is special capsule filling machine which is suitable for medium & small pharmaceutical factory, hospital preparation lab, etc. The machine is adopted programmable control system, touch panel operation, step-less transduction to speed-shift, and electronic automatic counter. And it can automatic complete the action of position, separation, filling, locking, etc. The dosage is accurate, and the operation is convenient. The overall machine is made of stainless steel, and it is suitable for the capsule which is filled with powder and grain.

This machine has independent empty capsule feeding station, powder feeding station and capsule closing station. The medium process needs to be processed by hand. The machine adopts variable speed control, the operation is very easy and simple, and the powder material feed correctly. The machine body and working table adopt S.S. material; meet the sanitary requirement of pharmacy.

The machine can be operated by touch screen; the making process is very easy

We can offer you the full auto capsule filling machine, semi-auto capsule filling machine, capsule filling machine for oil, capsule packing line, etc

Parameters:

Model:	DTJ-V
Capacity:	Max 20000 pcs/h
Machine suitable for:	capsule Size #00 to 4 000 customize
Power supply:	220v/380v 50Hz three phase one phase etc customize
Power consume:	3kw
Quantity of mould bores:	12pcs
Noise standard:	< 60dB(A)
Weight:	525kgs
Overall dimension:	1200×700×1600mm
