

Semi Automatic Double Side Labeling Machine

The Semi Automatic Double Side Labeling Machine features advanced process, thus to ensure high and reliable performance. Compared with ordinary product on the market, it can be an ideal facility used for food, medicine, daily chemical industries, agricultural and sideline products, electronics and other industries. It can complete the double-sided labeling of the product at one time, which better guarantees the double-sided labeling.

The Semi Automatic Double Side Labeling Machine greatly improves the efficiency of product labeling and film bonding. The position of the attachment is accurate and the stability is high. It avoids problems such as low manual labeling efficiency, skew attachment, blistering and wrinkling. It is helpful to improve labeling accuracy, which can eliminate wrinkles on the label and improve the quality of the label. All accessories are made of stainless steel and aluminum profiles.

Product specification:

Label accuracy	±1mm
Machine capacity	15~35pcs/minute (Depends on the efficiency of labor)
Label size	Length : 15mm~200mm Width : 15mm~150mm
Product size	Length:20-310mm, Width:20-150mm, Thickness:0.2-120mm
Machine dimension (Length*Width*Height)	1000mm×1100mm×1500mm
Machine Voltage	220V/50HZ
Machine Weight	150Kg
