

AFS-4 Ampoule Filling and Sealing Machine

Apply sample trial test and small batch production in pharmaceutical industry, ampoule filling and sealing in the condition of sterile.

The machine is four position stepping transmission system, a group of four ampoules enter each position each time, complete send bottle separately, filling nitrogen before, filling liquid, filling nitrogen afterwards and pre-heating, sealing etc process.

Technical parameter:

Ampoule specification	1ml/2ml	5ml/10ml	20ml
Capacity	About 7000-9000	About 6000-8000	About 4000
	bottles/hour	bottles/hour	bottles/hour
Material	304 stainless steel		
Total power	0.55kw		
Fuel consumption	2-2.5m ³ /h(gas), 0.08-0.1mpa (PLG)		
Dimensions	LxWxH:1650x900x1500mm		
Weight	400kg		
Power supply	380v 50Hz
