

JFS Automatic Drying Bottle Sterilization Machine

JFS automatic drying bottle sterilization machine is our company specializing in domestic and foreign cosmetics enterprises glass bottle, plastic bottle drying, disinfecting hard. This machine has the advantages of small occupation area, drying, high disinfection efficiency. The use of drying box covers an area of large, long drying time and complicated work. Is the ideal drying equipment cosmetics enterprises.

Feature:

- The appearance of novel, uses the entire stainless steel manufacture;
- The whole bottle baking process for continuous work;
- Covers an area of small, save the drying time, can be used with drying;
- Dryer's transmission is the frequency conversion, may adjust the drying speed according to bottle any different, drying temperature can be adjusted between 0-300C, ensure the effect of bronzing, hot silver original bottle.
- Ultraviolet sterilization, to ensure that after drying bottle with no survival of bacteria, extend the shelf-life of the product;
- Internal drying using stainless steel wind-heat type heating stick, ensures the life.

Technical parameter:

Model	JFS
Voltage	380V
Power	9kw
Machine size	2600*500*1500mm
Tunnel size	1200*300*1300mm
Drying speed	50-200pcs/min
