

BGJ-series Automatic Single Adhesive Labeling Machine For Bottles

This kind of Automatic Adhesive Labeling Machine is suitable for flat bottle to label control system adopted Panasonic Stepper two-axis PLC control, collocation large LCD human interface, it is easy to operate, servo motor control label. This machine is made of SUS304 and aluminum alloy.

Features:

Labeling speed is synchronized with conveyor speed track, can be used with 650mm diameter turntable automatically into the bottle, optional hot foil printer.

Standard score better bottle wheel for roundness and labeling speed is less than 80 of bottles per minute.

Separating screw labeling speed per minute for more than 80 bottles or more bottles and standing firm.

Technical Parameters:

Running speed	50-100bph
Suitable bottle size	Width < 80mm, label height < 180mm
Label roll inner diameter	76mm
Label roll outer diameter	≤360mm
Dimension	L2000 * W1130 * H1530mm
Weight	420KG
Label position	Single label,
	Front and back,
	Front back and neck.
