

## *Semi Liquid Filling Machine*

Filling Machine is well known name as Manufacturer and Exporter of excellent featured range of Semi Liquid Filling Machine provide specialized packaging and filling services for any type of liquid products viscous or free-flowing into bottles, cans and containers etc. This filling equipment finds usage for handling filling requirements in pharmaceutical, cosmetic, FMCG companies, nutraceutical and confectionery industries. Our Semi Automatic Liquid Filling Machine is manufactured by using cutting-edge process technology that allow in them to fulfill varied packaging application needs of the industrial clients. Our liquid filler is known for there characteristic like time and money saving, easy to operate and offers exact filling of the liquid.

Our Liquid Filling Machine have PLC control based operations, operation safety devices & automatic hopper level control system; to provide you secure & easy tool free adjustment. The reciprocating filling nozzle of these machines has self centering devices. The easy and effortlessly operating control panel is very helpful for total liquid filling. All the machines are sturdy and are made up of high quality S.S. they have high impact resistance and are non-corrosive & anti-rust. Hence these machines are very durable. These machines are also energy efficient as well as very affordable. We also produce qualitative Semi Liquid Filling Machine.

Our products are in huge demand in the cities such as Nagpur, Jaipur, Agra, Amritsar, Mysore, Warangal, and Tirupur etc.

### **Features:**

- PLC control based operations
- Automatic hopper level control system for safe applications
- Effortlessly operating control panel for total liquid filling

- One way nozzle to avoid dripping
- Changeable volume capacities
- High speed & outstanding performance
- Very durable
- Rust and corrosion resistant
- Sturdy construction

**Applications:**

- Ghee
- Edible oil
- Masala Paste
- Adhesives
- Automobile Lubricants oil
- Chemicals
- Ketchups & sauces
- Juices and squashes
- Ink etc.

**Technical Specification:**

Capacity	5-20 ml, 20 ml-40 ml, 40-100 ml, 100-250 ml, 250-500ml, 500-1000ml (Different types of machines)
Sealing type	3 side seal, 4 side seal
Film size	60-350 mm width, 40-200 ml length
Speed	20 to 80 bags per minute
Power	½ HP motor, 220 V, 50 Hz, single phase
Net weight	350-400 Kgs. (approx)
M/C. Dimension	790x 660x 1730 mm
