

NJP-260C Hard Capsule Oil Liquid Filling Machine

This machine is a hard capsule filing machine with intermittent liquid injection pump control system. It meets GMP requirements and has advantages like compact structure, smaller size, low noise, accurate filing dosage, complete functions and smooth operation. The machine can complete the whole functions from capsule feeding, separating, filing, rejection, locking, until finished product discharging.

Introduction:

1. It has been improved the inner design turret, and imports beeline bearings for each machine from Japan directly, so that it can be sure a longer usage-life and precision of machine.
2. The working station cam runs under the good lubricating condition, increasing the pressure pulverization oil pump, thus extends the operation life of the spare parts.
3. Single movement for both upper and lower segments with two-lip seal provide a much better sealing performance.
4. It is controlled by the computer, has a stepless timing with the frequency-conversion, the numeral showing makes an easy operation and clear appearance.
5. It has a protector equipment for the operator and the machine. It has automatic pause equipment when it is lack for the material. It has a steady and safe working, it is the best choice for the hard capsule made factories.

Specifications:

Capsule Size	Suitable for filling capsule size 00#-5# Safety capsule size: A-E (need to exchange the spare parts/molds accordingly)
Capacity	260 capsules/min
Filling dosage	Powder/Pellet/Tablet
Power Supply	220/ 380V 50/60Hz 2.2kw (Can be made according to the client's voltage standard)
Noise	<75dBA
Machine Size/N.W.	930×790×1930mm Net Weight:800KG
Packing Size/G.W.	1600×1000×2150mm Gross Weight:900KG
