

FR-900 Automatic Horizontal Plastic Film Bags Heat Sealing Machine

FR-900 series of automatic plastic film sealing machine adopts electronic constant temperature control and automatic conveying device, can control different shapes of plastic film bags, can be used in all kinds of packaging line, the seal length is not limited

Sealing machine widely used in: food, pharmaceutical aquatic, chemical and electronics industries.

Sealing machine can seal all kinds of bags

Kraft paper, fresh keeping bag, tea bag, aluminum foil bag, shrink film, food packaging bag, etc.

Notice:

This machine is standard with embossing wheel. If need smooth wheel and stripe wheel need to buy additional.

The operation method for printing wheel to change date

- A: Use across screwdriver to unscrew the screw head
- B: Unscrew the top screw, the screw does not need to take off, you can unscrew
- C: Lift the wheel by hand, slowly remove the wheel
- D: Remove the embossing wheel
- E: Wheel and wrench
- F: With the wheel wrench unscrew the lid
- G: Unscrew the lid, took out the words. Change the words you need.

Technical Parameters:

Model	FR-900
Voltage	110V/220V, 50/60HZ
Sealing Power	850W
Motor Power	50W
Sealing speed	0-12m/min
Sealing width	6-15mm
Control tempt	0-300°C(adjustable)
Printing type	Steel letter
Film thickness	≤0.08mm
loading	≤5KG
Dimension(L*W*H)	840*380*320mm
Net Weight	19kg
