

## AP-610 Automatic Labeling Machine

### Features:

- Microprocessor control provides in one side or in front and back labeling choices.
- Synchromesh of conveyor and screwed have products be labeled in accuracy and run in stable speed.
- Simple adjustment for different size containers.
- Accurate labeling under the synchromesh of servo motor of top-holding unit and conveyor.
- Transparent label sensor (optional) is used to ordinary or transparent label

### Instance:

Apply the label on all kinds of round or quadrate container in one side or in frond and back, one run.

### Optional equipment:

Hot foil printer/ Inkjet printer / Feeding unit / Collecting unit / Encoder

### Specification:

Power	110/220/380v, 50/60Hz
Speed (label/min.)	30~120 pcs
Label width (mm)	10 ~ 120
Label length (mm)	10~300
Label I.D (mm)	75
Label O.D (mm)	300
Machine Size (mm)	2500(L)*1750(W)*1600(H)
Weight (Kg)	250
