

TN-200LDS Automatic Sticker Labeling Machine for Glass/PET Bottles

TN-200LDS Drum Double-sides Labeling Machine is making up with the PLC, touch screen, servo motor label pressure structure. It is of multi-help functions and alarm showing function. It is suitable for the two sides self-adhesive labeling of square and flat bottles.

Features:

1. High Capacity: bottle shaping +dislocation labeling, which improves stability.
2. Servo motor system and France Schneider system enables the high efficiency, stable and low energy consumption.
3. Labeling module uses the imported emery, composed the driven roller structure: good friction ensures the labeling precision.
4. Multi-coordination, alarm units together guaranteed the safety of the equipment
5. Whole machine is easy to clean
6. Digital regulating handle makes specification easier
7. Pure alloy labeling stick, which is better than plastic type
8. High precision of photoelectric: all adopted qualified specification brand model

Technical Parameters:

Model	TN-200LDS
Labeling Precision	±2mm
Applicable Bottle Size	Min 140×200×320mm, Max: 260×290×500mm (L*W*H)
Labeling Speed	1500-2000 Drums/hour
Label Height	≤190mm (Customized)
Power	220V, 50HZ, 3KW
Material	SUS304
Weight	400KG
