

L Bar Heat-shrink Film Wrapping Machine HY-450, HY-550

This machine is an automatic sealing cutting and shrinks packing machine, widely used in mass production of the packaging line, automatic feeding the film, automatic punching, automatic covering film and cutting film, automatic reeling waste.

Only need to manually adjust the film guide system and feeding platform, suitable for different width and height products.

The machine widely used in software, food, cosmetics, pharmaceutical, printing, beverage, and other industries.

Technical Parameters:

Model	HY-450, HY-550
Packing Material	Folded POF/PVC
Speed	1-15 meter/minute
Width's Range	HY-450: Width: Product's Width+Product's Height≤400MM
	HY-550: Width: Product's Width+Product's Height≤550MM
Length's Range	HY-450:Length: Product's Length+Product's Height≤480MM
	HY-550:Length: Product's Length+Product's Height≤650MM
Film Width	HY-450:≤480mm
	HY-550:≤650mm
Max Outer Dia of Film Roller	≤290mm
Power	220V 1.5KW + 380V 9.6KW
Weight	350kgs +200kgs
Overall Dimension	1620x880x1470mm
	1910x680x1330mm
