

GTI-C400 Fully Auto Capsule Filling Machine

GTI-C Series Automatic Capsule Filling machine adopts advanced full-sealed structure with novel appearance and possesses the advantages of adjustable medicine filling, precise dosage, high rate of capsule getting on the machine, frequency conversion speed regulation, safety and simple to operate etc. It's suitable for filling form of medicine such as active material, starch, lactose, filling material, diluents or lubricant etc. It can automatically complete the whole capsule filling process including capsule separating, filling, waste rejecting, capsule recapping, finished product pushing, waste capsule removal etc.

With help of different size parts, machine is suitable for different size capsules. The production speed can be controlled by means of a VFD (Variable Frequency Drive). Machine is designed in accordance with cGMP standards. All product contact parts are made of Stainless Steel 316 & machine covered by Stainless Steel 304. Advantage of the machine is advanced design, sturdy structure, precise dosing, and safe and reliable, high filling rate etc. Machine having wide usage in R&D laboratories, Research Institutions, Herbal & Nutraceutical preparations, Unani & Ayurvedic medicines, Pilot batch productions etc.

Technical Parameters:

Model	GTI - C400
Capacity	400 caps/min
Number of Capsules (per cycle)	4
Capsule Size	000#-5# and safety capsule
Power	380/220V 50/60Hz
SNR	<75dB
