

YK-100/160 CE Pharmaceutical Swing (Oscillating) Granulator Machine

YK-160 is fully made of stainless steel, for wet-process Granulating with easy operation and maintenance, conveniently disassembling and cleaning, and free of blind corner, and complies with GMP requirements.

This machine is mainly composed of pendula roller, main body, transmission system, and tightening device of sieve. It could work together with dryer for making dry granules for preparation of tablet compression.

This machine could be customized to be YK-60, YK-100 or YK-160 for different purpose.

If for lab or small scaled manufacturing, you may choose YK-100 or even YK-60. For batch manufacturing, we recommend you YK-160.

If for dry material granulating, we recommend you GK Series of dry granulator. Welcome to check with us the related information about GK series.

Technical Parameters

Model	YK-100	YK-160
Capacity(kg/h)	30-200	50-300
Motor power(kw)	1.1	2.2
Cylinder speed(rpm)	55	
Swing angle	360	
Cylinder diameter(mm)	100	160
Weight(kg)	280	450
Overall size(L*W*H)(mm)	700*600*1050	1000*800*1300
