

KZF-01L Vertical Trinity Machine For Unpacking, Packing And Sealing

Fully automatic Vertical trinity machine for unpacking, packing and sealing is a mechatronics automatic packing machine and equipment designed by our company with integrating advanced and excellent technology.

The equipment integrates automatic unpacking system, packing system and sealing system in one;

It is suitable for automatic packing of various products of the same specification and model, and can be used as a stand-alone machine or in combination with the previous automatic packaging machine for automatic packaging assembly line operation.

The equipment is widely used in various industries such as medical supplies, chemical supplies, sanitary supplies, and food. It can be used for automatic unpacking, packing, and tape sealing operations of boxed, bagged, and bottled products. It is a special type of supporting equipment.

Technical Parameter

Dimensions (L×W×H)	4690×3250×2800mm (subject to the actual final device size)
Weight	800kg
Air source pressure	0.6-0.8MPa
Compressed air consumption	About 5L/Cycle
Input power	Three-phase five-wire system 380v/50Hz
Control power	DC24
Maximum arrangement size (L×W×H)	L(300~500)*W(200~400)*H(120~400)mm
	(Can be designed according to specifications)
Packing speed	1-5 cases/min (Cases/min)
Maximum tape diameter	Φ250mm
