

CJXH-2800B Automatic Aerosol Filling Machine

CJXH-2800B automatic aerosol filling machine consist of can arrange machine, rotary liquid filling machine, valve insert machine, rotary sealing and gas filling, automatic weight checker, water bath, nozzle presser, cap presser, ink jet printer, carton sealing & strapping machine.

This automation aerosol filling machine can filling with the international standard of 1 inch valve and spray cans. It is suitable for filling DME, LPG, N₂, compressed air, CO₂ and other propellants.

Our Machine Advantages:

1. CJXH-2800B Type Fully Automatic Aerosol Filling Machine Production Line is manufactured based on the combination of advanced foreign technology and domestic aerosol filling industry development
2. CJXH-2800B Fully Automatic Aerosol Filling Machine adapts origin Japanese (SMC and CKD) and Italian (METAL WORK) pneumatic components;
3. Cylinder gasket ring adapts import material, has accuracy of $\pm 1\%$;
4. And our fully automatic aerosol filling machine has own good reputation of being reliable, easy handling and easy maintenance.
5. Automatic aerosol filling machine is widely used to fill products in food, medicine, sanitation, automobile, environmental protection, fire protection and daily necessities, such as hair spray, air cleaning spray, health care, insecticides, disinfectants, extinguishing agent, carburetor detergent, spray paint, gas lighter and polyurethane foam, etc.

Technical Parameters:

Outline (L*W*H) (mm)	18000*1800*1900
Capacity (cans/hr)	2000-3200
Liquid fill (ml)	50-1000 (customized)
Gas fill (ml)	20-700 (customized)
Repeated filling accuracy	1%
Diameter of cans (mm)	35-65 (customized)
Height of aerosol can (mm)	80-350 (customized)
Valve (mm)	25.4(1 inch)
Working pressure (MPa)	0.65-1
Max. gas consumption (m3/min)	5.5
