

MIC-ZF12 Bleach Anti-Corrosive Filling Machine

This filling machine is suitable for: pesticides, chemicals, bottled agent type liquid dispensing, bottle filling, Applicable to a variety of different types of containers.

This machine function is:

1. This machine combines optical, mechanical, electrical, gas in one machine.
2. Adopt through control filling time to reach different volume filling.
3. Filling time can be precisely controlled to a hundredth of a second.
4. The filling process is completed under the PLC program control on the touch screen.
5. Having a stable and reliable operation, high efficiency, adaptability, the filling volume of measurement specification can be changed within a few minutes.
6. Filling valve use imported brands, advanced technology, sophisticated, non-drip filling phenomenon.
7. All parts frame, conveyor, valve, filling nozzle use anti-corrosion material.
8. Can customize vacuum or diving filling avoid have forma when filling.

This machine is our MIC automatic inline straight line normal pressure filling machine, can Prevent corrosion.

It can be used with capping machine, labeling machine supporting the formation of the production line.

This machine is guaranteed for one year and you can extent your guarantee easily by discuss with our sales.

Which you might be interested, under guaranteed, machine parts got broken by daily use, we will replace it once we are informed by free DHL.

PARAMETER

Filling Heads	12 heads
Min Filling Volume	500ml-5000ml
Production Speed	2000 Bph(basis on 5L bottle)
	3000-5000Bph (basis on 1L)
Voltage	220V/380V
Power	1 kw
Application Bottle Type	1-5L different shape bottles
Filling Error	$\leq\pm 0.5\%$
Work Pressure	0.55Mpa-0.65Mpa
Size	2000mm × 1000mm× 2200mm
Weight	700 kg
