

Horizontal Doypack Machine TY-HDM250

It is designed for stand up pouch (doypack) with zipper (zip lock). With different type of dosing system, such as screw auger filler, volumetric cup filler, multi-head filler, the machine can be used to pack powder, liquid and granule product, such as sugar, spices, juice, tomato paste, nuts, candy, washing detergent, lotion, pills, capsule, pesticide, fungicide, etc.

1. Fully Automatic Horizontal Roll Film Forming & Packaging Machine, specially designed for small and medium sized bags.
2. Double-station dosing function, mainly used for food, cosmetic, agricultural and other industries. Able to pack material like liquid, powder, granular, etc. Applied for flat bag, three or four-sided seal packaging. Different dosing device for different product packaging.
3. Bag forming, sealing and filling are relatively two independent systems from each other, which are coordinated by mechanical linkage and programmable logic controller (PLC).

Technical Parameters:

Model	TY-HDM250
Packing Volume	≤200ml
Bag Length	80-180mm
Bag Width	65-130mm
Film Roll ID	70-80mm
Film Roll OD	400mm
Packing Material	PE, MLCM, etc.
Packing Speed	60 bpm
Machine Size	2,580(L)*945(W) *1,550(H)mm
Machine Weight	700kg
Power Supply	380V 50HZ/60HZ
