

## Rice Brick Vacuum Packaging Machine MCZXZK500N / MCZXZK500NS

The 500N/500N2 internal suction vacuum packaging machine can realize automatic loading, weighing, bag making, filling, shaping, vacuum extraction, sealing, bag cutting and finished product transportation, and turn the bulk material packaging into a hexahedral small package with high added value. The packing is fast and stable. The unit is widely used in the vacuum packaging of grain products such as rice grains and powders such as coffee. It is suitable for mass production.

### Scope of application:

Powder materials (such as: coffee, yeast, milk powder, food additives, metal powder, chemical products);

Granular materials (such as rice, grain, pet food);

### Technical features:

Model	MCZXZK500N	MCZXZK500NS
Dimension(mm)	6000×2800×3200	8800×3800×4080
Packaging Pocket	hexahedron	hexahedron
Bag size (L×W) mm	(60~120) × (40~60)	(60~120) × (40~60)
Measurement range(g)	100-1000	100-1000
Packaging Speed (bag/min)	16~24	25~40
