

Bottom Wrapped Reverse Horizontal Flow Pack Packing Machine FLM 5000

FLM 5000 is the reverse horizontal flowpack packaging machine where the bobbin of the machine is located on the bottom.

Irregular shaped products or multi-grain products such as fruits, vegetables, live fish, roll bandage etc.. Can be packaged horizontally by wrapping from the bottom side.

It is possible to take out the air or the atmosphere inside the package. This will increase the lifetime of the product.

Reliable, durable, tight, attractive, excellent packaging: It ensures to make the packaging of different kinds of solid products horizontally and receive excellent and tight packages in the food, chemical, health, furniture, car and other similar industries with the flexibility and sensitiveness that the machine provides even in very high-speed operations.

Capacity: 200 packages/min.

Capacity changes depending on the type of the packaging material, the sealing style whether it is hot sealing or cold sealing and the dimensions of the product and the package.

It is possible to design a packaging machine with higher capacities according to your production volume.

Package Dimensions: The dimensions given below are the standard packaging dimensions of this machine. For the different dimensions within this interval, the necessary adjustments for packaging might be done on the packaging machine. For the dimensions except this interval, special custom-made packaging machinery is possible to design and produce.

Packaging Material: The machine works with printed and unprinted packaging materials used in hot or cold sealing such as OPP, BOPP, CPP, polypropylene, aluminum foil, aluminum and paper laminations, etc.

<i>Standard Machine - Packaged Product Dimensions</i>		
	min.	max.
Height	2 mm.	60 mm.
Width	10 mm.	150 mm.
Length	25 mm.	350 mm.
<i>For the products with the dimensions except this interval, special custom-made machinery is designed and produced upon the customer's request.</i>
