

Vertical Powder Form Fill and Seal Packaging Machine F520

This machine is suitable for automatic packaging of powdered materials such as flour, fine sugar, milk powder, monosodium glutamate, seasonings, food additives, pesticides, washing powder etc.

Features

1. Imported PLC, man-machine interface control system, touch screen operation.
2. Servo film feeding system, accurate positioning, automatic correction device for sealing and cutting positions, high degree of automation.
3. Adopt intelligent temperature controller, accurate temperature control, to ensure beautiful and smooth sealing.
4. The perfect automatic alarm protection function reduces the loss to a minimum.
5. This machine can automatically complete the entire packaging process of feeding, metering, filling, bag making, and date printing when matched with a metering device, and automatically complete counting.
6. Bag making form: This machine can make pillow bags and perforated hanging bags according to customer needs.

Technical Data

Packing speed	40bags/min
Bag size	F420: (L)80-300mm(W)80-200mm
	F520: (L)80-400mm(W)80-250mm
Packing range	50-2000ml
Film width	F420:180-420mm F520:180-520mm
Packing material	OPP/CPP PET/PE OPP/CE etc
Film thickness	0.04-0.08mm
Air compression	0.3m ³ /min 0.65MPa
Power	AC220V 50Hz 3.5kw
Machine dimension	F420: (L)1750×(W)1050×(H)1500mm
	F520: (L)1795×(W)1150×(H)1650 mm
