

Automatic Gas Flushing Food Tray Pack Sealing Machine GT680

GT680 Automatic gas flushing food tray pack sealing machine also called Automatic modified atmosphere tray sealing machine.

Automatic MAP machine adopt high precision gas mixing system, it's able to convert gas type and mixing proportions quickly depend on different foods, to keep packed food fresh and extend the shelf life, in order to match user requirements.

Custom-made: customization tray size, one time seal 1/2/3 pcs.

Packaging container: Plastic container/tray/cup/bowl.

USES: It's suitable for packaging meat, delicatessen, sea food, fruit, vegetables, fast food and etc.,.

FEATURES: Adopt micro-computer PLC and screen touch panel control system, easy to set all parameters, runs stabilization, simply operation. Top quality with high efficiency, long freshness, various application.

Gas type:

1. Nitrogen: 100% only.
2. Nitrogen: 70%, carbon dioxide: 30%.
3. Oxygen: 80%, carbon dioxide: 20%.

Specification:

Items	Specification
Voltage	AC380V/50HZ
Max input power	4.8KW
Air pressure	7-8KG/CM2
Gas mixture precision	≤2%
Fresh air pressure	≥4.0KG/CM2
Replacement rate	≥99%
Capacity	6-10cycle/min
Weight	700KG
Dimension	2480*1070*1640mm
