

KV-160PS1(PS2/PSN) Vibration Plate Automatic Counting Packing Machine

Features

- Tailored to the screw samples of the vibration plate, linear vibration arrangement, and sophisticated counting control device to ensure that each bag is accurate.
- Advanced and accurate bag making system enables the error of bag $\leq 0.5\text{mm}$.
- Automatic display of the number of packages, the statistics can easily work out the machine.
- The machine advanced step control, with the use of color tracker can get the perfect icon design.
- SCM control system, fault self-stop, self-alarm, self-diagnosis, safe and easy to use.
- Vibrating plate can be customized according to the requirements of different material. Single or multi plates are available.

Application & Bag Type

Application: suitable for screw, dowel, tablet, button, chocolate bean, electronic component, medical, etc.

Technical Parameters:

Model	KV-160PS1	KV-160PS2	KV-160PSN
Machine Type	single vibrating feeder	two vibrating feeder	multi vibrating feeder
Suitable For	single material	two material	multi material
Bag Shape	pillow bag/ stick sachet/ 3 side sealing/ 4 side sealing		
Packing Speed	30-80bags/min		
Roll Thickness	0.05-0.15mm		
Roll Width	30-320mm		
Roll Diameter	320mm		
Bag width	30-110mm		
Power	220V, 1.4kW		
Optional Device	Coding printer/Gas-filled device/Bag connecting device/Pouch device/Easy to tear gap
