

Nuts Peanut Food Feed Bag Packaging Machine

Food feed bag packaging machine is specially used to package granular food. The light signal is converted into electrical signal, controlled by the PLC system, and the photoelectric system is applied to the horizontal premade pouch packing machine. The pneumatic device is used to achieve a very accurate count, 100 per package. The error of the screw is 0, and the error of 1000 per pack is 1. It is a pneumatic device, and the power consumption is 1/200 of the traditional machine.

Technical Parameters:

- Measurement range: Determined according to the product
- Bag length (mm): 40-150
- Bag width (mm): 40-100
- Production capacity (bags/min): 30-70
- Total power (Watts): 1600
- Net weight (kg): 350
- Air consumption: 20 L/Min 0.75Ma
- Packaging materials: composite film materials, aluminum foil
- Dimensions (mm): L1200×W800×H1600
