

SN-1 Semi Auto Rotary Yogurt Cup Filling Machine

Our SN-1 Semi-auto Rotary Coffee Filling and Sealing Machine can be used for filling different kinds of coffee capsules. Such as Nespresso, K-cup and Lavazza capsules. But if you want to use roll film, the mould can't be changed.

One machine can only fill one kind of coffee capsule.

And this machine is especially designed for small quantity need, with flexible operation, and small occupied area. Very economical.

Applications:

It is mainly used in the products packing like: Tea powder or grains tea coffee powder, milk powder, rice, wheat powder and so on.
