

JTB-S-type double-sided adhesive labeling machine

Purpose and brief

The function of the square bottle or other container to complete the appearance of the double-sided self-adhesive labeling. The use of orthotropic re-positioning technology, accurate labeling position; reference thermal printer head printing batch number; PLC full control, touch screen set parameters; and whether the bottle not to sign, automatic fault alarm functions. Local interference is strong, stable and reliable performance.

Main technique parameters

Production capacity: 40 ~ 80 bottles / min

Applicable standard: a square-sided bottles or other containers labeling

Labeling rate: $\geq 99.5\%$

Power supply: 220V 50Hz

Power: 1.5Kw

Dimensions: 2200×1500×1400
