

## *Rotary Vial Filling Machine YQGZ-50*

### **Feature:**

- Microcomputer setting, PLC control, touch screen operation, it is high automated, easy to operate with stable performance
- High safety factor, the e-liquid filling machine can stop automatically if there is low pressure, no filling, no inner plug in any rail etc.it can work both alone an together with other machine
- The part which touches the liquid medicine is made of 316 or 304 stainless material completely, meets GMP standard.
- It can be customized, the product quantity can be controlled according to customer's requests, no matter 2/4 heads.

**Technical Parameters:**

Applicable specifications	5-50ml
Filling head	two heads
Production capacity	30-50 bottles /min(two filler);60-80bottles /min(4 filler)
Filling accuracy	±1%
Capping rate	≥99%
Power supply	220V / 50Hz;380V
Power	2kW
Total dimension	2500 * 1000 * 1500MM
