

ZS-XG16DV Automatic Capping Machine

This automatic capping machine has functions of pressing and screwing caps. The pressing head and capping head can be used at the same time or choose one of the two. It is easy to adjust and operate; this machine is widely used in food, beverage, cosmetics and daily chemical industries.

Technical Parameters:

- Working voltage:AC220V/110V 50- 60HZ
- Bottle height:30-300mm
- Cap diameter:18-70mm
- Bottle diameter:20-160mm
- Working speed:20-60 bottles/min(dependent on bottle and cap size and shape)
- Working pressure:0.4-0.6MPa
- Machine size: About 3360*680*1560mm
- Package size:1970*1170*1735mm
- Net weight/Gross weight: About 157kg /257kg
