

Hard Gelatin Capsule Filling Machine NJP-2000, 2500B/C/E

This machine is a kind of intermittent operation, full automatic hard capsule filling equipment with hole type filling. Combined with the characteristics of traditional Chinese medicine and the requirements of GMP, the machine has been optimized and designed. It has a compact structure, small model, low noise, accurate filling dose, complete function and smooth operation. It can simultaneously complete sowing, packing, filling, scrap, lock, finished product, module cleaning and so on. It also has the advantages of cleaning and filling. The lifting mechanism of the position can meet the needs of the large batch production of the enterprise, greatly save the financial resources and manpower, and it is the most ideal hard capsule filling equipment for the pharmaceutical and health care products.

Technical Parameters:

Machine type	NJP-2000B/C/E	NJP-2500B/C/E
Filling type	Powder, granule, tablet	Powder, granule, tablet
Applicable capsule model	(00#-5# capsule / safe capsule A-E)	
Highest capacity	120000 tablets / hour	150000 tablets / hour
Power requirement	380V 50Hz 3.37kw	380V 50Hz 3.37kw
Noise indicator	≤75dBA	≤75dBA
Dimensions	1200×1150×1950mm	1200×1150×1950mm
Machine net weight	1450kg	1450kg
